Executive Summary

We are in a time of great change in general practice with practices merging, evolution of federations, locality working and the emerging accountable care systems. The list based system of general practice remains a cornerstone of the NHS and is the main reason that the NHS is judged internationally to have one of the most cost-effective healthcare systems in the world. But this is no longer enough, the NHS is facing both a financial and workload crisis. The future will mean that we need an out of hospital model delivered at scale that is supportive of and embedded in general practice.

General Practice has worked closely with clinicians such as practice and community nurses in the past and the ability to allow nurses to prescribe has been a welcomed positive step and has proven to be safe, effective and appreciate use of time, knowledge and skills. Over the last 5-10 years increasingly there are other healthcare professionals joining the primary care team such as Specialist Nurses, Advanced Nurse Practitioners, Pharmacists, Paramedics, MSK Practitioners and Mental Health workers. To add value to the primary care team and provision of care to patients, these individuals have developed their skills and knowledge to have a deeper understanding of disease processes, making a diagnosis and managing a variety of conditions that fall within their scope of practice and competencies. Prescribing is an integral part including prescribing the appropriate medication.

I hope you will find this document useful in supporting Non-Medical Prescribers employed in general practice to provide evidence of their competencies through reflection and continuous professional development.

Dr Nigel Watson, MB BS FRCGP DCH DRCOG
Chief Executive
Wessex Local Medical Committees Ltd

Helene Irvine
Nurse Advisor
Wessex Local Medical Committees Ltd
Aim of the Guidance
This specific guidance is for non-medical prescribers (NMPs) within the following CCGs and supports the work currently being undertaken within Trusts in the localities across:

- West Hampshire
- North Hampshire
- South East Hampshire
- Dorset
- Fareham & Gosport
- Portsmouth City
- Southampton
- Isle of Wight
- Health Education England

This guidance has been developed to support non-medical prescribers to promote good practice, improve service delivery and ensure patient safety, this is a multi-professional document. It is anticipated that this guidance will be updated on an annual basis and changes made where relevant and could be used by NMPs in other CCG localities.

The Objective
To standardise ‘Best Practice’ in NMPs employed within the primary care setting across CCGs and links with the portfolio development of NMPs in the local Trusts to:

Promote Quality and patient safety in relation to prescribing by NMPs
Support Professional Development & competency in Prescribing Practice through education and clinical supervision
Assure Good Governance

The document was developed through support and feedback from:

- Wessex Health Education England
- Wessex Community Education Provider Networks (CEPN)
- Wessex Non-Medical Prescribing Forum
- Local CCGs
- Non-Medical Prescribers and
- Wessex LMC

It is based on some excellent work produced by Dorset Healthcare University Foundation Trust. The steering group would like to thank Debbie Streeter for sharing her documents with us, some of which we have adapted for use in the general practice setting.

The Prescribing Competency Framework for all Prescribers has been reproduced with the permission of the Royal Pharmaceutical Society (See Appendix 1).

The writing of this document involved the support and contribution from many people across a range of organisations to reflect the multi-disciplinary approach.
Members of the Steering Group

Helene Irvine  
Nurse Adviser Wessex LMC  
Advanced Nurse Practitioner, St Clements Practice, West Hampshire CCG  
Deputy Clinical Lead RCGP – Practice Support

Ian Winkworth  
CEPN, Primary Care Learning Environment Lead – Nursing, Wessex Health Education England (HEE)

Pippa Stupple  
Programme Director for General Practice Nursing, Wessex Health Education England (HEE)

Julia O’Mara  
Practice Nurse Advisor & Advanced Nurse Practitioner, Portsmouth CCG

Sue Hill  
Senior Education Commissioning and Development Manager, Wessex Health Education England (HEE)

Thomas Crawford  
Quality Manager, North Hampshire CCG

Katy Winkworth  
Advanced Nurse Practitioner, North Baddesley Surgery, West Hampshire CCG

Amanda Waite  
Primary Care Quality Lead, Southampton CCG

Viv O’Connor  
Nurse Facilitator, West Hampshire CCG

Sarah Lyon  
Advanced Nurse Practitioner, Southampton CCG

I would like to thank the following people for their valuable contribution in the writing of this document:

Helen Baker  
Primary Care Learning Environment Lead – Pharmacy, Wessex Health Education England (HEE)

Liz Bere  
Head of Medicines Management, Southampton City CCG

Esther Clift  
Consultant Practitioner Trainee in Frailty Health Education England (Wessex)

Simon Cooper  
Deputy Director Medicines Optimisation, Portsmouth CCG

Katherine Gough  
Head of Medicines Optimisation, Medicines Management Team, Dorset CCG

Francine O’Malley  
Lecturer, Programme Lead Non-Medical Prescribing, Centre for Innovation and Leadership in Health Sciences, Faculty of Health Sciences, University of Southampton

Carole Phillips  
Advanced Nurse Practitioner, East Shore Partnership, Portsmouth CCG

Adelle Weir  
Specialist Pharmacy Technician – Primary Care, Medicines Management Team, Dorset CCG

Julie Thornley  
Business Manager Wessex Local Medical Committees Ltd
1. Introduction

Over the last fifteen years the ability to prescribe has been extended to nurses, pharmacists and other allied health professionals. The ageing population presenting with co-morbidities and patients with increased complex conditions has resulted in poly-pharmacy being the norm for many patients. Maintaining competency and keeping up to date can be challenging and often made more difficult working within primary care where NMPs maybe working in isolation, often under time constraints and with an increasing workload.

2. Background

Health Education England (HEE Wessex) non-medical prescribing forum was developed to share good practice and address the strategic needs of the workforce. It is composed of representatives from provider Trusts across Wessex, Health Education Institutes, HEE and representatives from primary care.

A sub-group was established to look at how support could be provided to NMPs specifically working within general practice and as a result this guidance document has been developed.

3. Purpose of the Guidance

In July 2016 the Royal Pharmaceutical Society in conjunction with a variety of national bodies provided a Competency Framework for All Prescribers, developed to “establish a common set of competencies’ to underpin prescribing regardless of professional background” (RPS – A Competency Framework for all Prescribers, July 2016)

Click on the following link to access the guide: A Competency Framework for all Prescribers

The purpose of this document is to provide information for NMPs working within primary care and enable them to provide evidence of their competency as part of their ongoing professional development.

It is anticipated that every NMP in general practice will identify a clinical colleague to provide ongoing supervision and who will jointly complete and sign the competency framework in Appendix 1 on an annual basis. The process will ensure:

- The NMP is competent to prescribe safely
- Identifies any gaps in their knowledge
- Will clarify any further training required
- For nurses provide evidence for Nursing and Midwifery Council (NMC) revalidation

Click on the following link to access the guide: Standards of Proficiency for Nurse and Midwife Prescribers

It is recommended that every NMP is familiar with the local policy and guidance on prescribing within their CCGs.
4. Providing Evidence: The list is not exhaustive!

4.1 Evidence
Provides confirmation that you have undertaken an activity. Examples…

- Feedback from patients, carers and colleagues
- Examples of audit undertaken to reflect on your prescribing behaviour
- Examples of a change in prescribing and why you have made this change?
- Attendance at medicine management and or prescribing meetings
- Clinical supervision
- Case discussion with colleagues
- Courses attended
  - Presentations
  - Literature read and reviewed
  - Continuous personal and professional development
- Reflection
  - Ongoing documentation
  - Competency framework

- Your prescribing role included in your job description
- Evidence of indemnity to cover the role of prescriber within your place of practice

4.2 Reflection – Example
(Adapted from Gibbs (1988) Model of Structured Reflection)
4.3 Keeping Up to Date...

The following advice has been summarised from that provided by the General Medical Council but it is relevant to all prescribers:

- Work within your level of competency, maintain and develop the knowledge and skills in pharmacology, therapeutics, prescribing and medicines management relevant to your specific role.
- Use electronic systems to improve the safety of your prescribing which highlights interactions and allergies.
- Register for email updates from the Medicines and Healthcare Products Regulatory Agency (MHRA) and the NHS Central Alert System. Register and use the NICE Evidence Search (formerly National Electronic Library for Medicines), the NICE - Medicines and Prescribing Centre (formerly National Prescribing Centre) and the electronic Medicines Compendium for Summaries of Product Characteristics and Patient Information leaflets.
- Be familiar with guidance in the British National Formulary (BNF) and BNF for children. The electronic BNFs are updated more regularly than the printed copies.
- If unsure about interactions or other aspects of medicines, seek advice from experienced colleagues, including community, hospital and CCG pharmacists, prescribing advisers and clinical pharmacologists.
- Take account of clinical guidelines and technology appraisals published by for example NICE and other authoritative sources of speciality specific clinical guidelines.

Always refer to your local CCG for advice on prescribing which is updated on a regular basis.
5. **Basic Guidance when Prescribing**

### 5.1 Prescriptions

The following recommendations/guidance links are acceptable for prescription only medicines:

- NICE Prescription Writing Guidance
- NICE Controlled Drugs and Drugs Dependence Guidance

### 5.2 Prescribing

Ensure the following . . .

- The name, age and address of the patient is stated
- The address of the prescriber is stated and indicates the type of Prescriber
- It is signed in ink by the person who has clinically assessed the patient
- It is legible and written in English without abbreviation
- The quantity to be dispensed is clearly stated
- That another prescription is issued if changes are to be made after issuing a prescription
- If a ‘device’ is prescribed, the patient and or carer understand how to use the device
- You check the patient’s details, especially age, current medicines, allergies, interaction with other medicines
- The patient is provided with additional information if required
- You check the patient’s/carers/parents understanding of dose and frequency
- That you provide advice on the appropriate storage of medicines and safety
- You record in the patient’s notes that you discussed with the patient information around compliance and how and when to take the medication

Each patient who requires a medicine must have their own prescription

You avoid “as directed”

Ensure that clear directions are given for each item prescribed

Avoid the following . . .

- Using unnecessary decimal points e.g. use 300mg
  NOT 0.3g
- Use of the decimal point is acceptable to express a range e.g. 0.5 to 1g
- Abbreviating drug names and or dosage
- Making any changes to computer generated prescriptions after it has been issued.
  You should issue another prescription
- Do not prescribe for yourselves or for anyone with whom you have a close personal or emotional relationship
- Issuing prescriptions to replenish stocks of dressings or other supplies that have already been issued or administered to a patient
5.3 Good Practice in Prescribing and Repeat Prescribing for all NMPs

It is good practice to prescribe drugs generically using their approved, International Non-proprietary Name (INN) (i.e. as described in the BNF) and not specify the manufacturer or supplier, except where a change to a different manufacturer's product may compromise efficacy or safety.

Generic medicines are, overall, much less expensive to the NHS. Their appropriate use instead of branded medicines delivers considerable cost savings.

Generic Prescribing Guidelines Link

It is essential that each prescriber is familiar with their practice policy on repeat prescribing to ensure patient safety, compliance and appropriateness of prescribing. Each practice and CCG should have a repeat prescribing policy.

This link https://www.wessexlmcs.com/search?q=prescribing is taken from the Wessex LMC website and based on guidance published by the GMC which came into effect on 25th February 2013. NMPs are advised to refer to their own organisation and CCG policy on prescribing.

5.4 MHRA Advice on Prescribing Unlicensed Medication

Routinely, only medicinal products licensed in the UK should be used for the treatment of patients. Circumstances may arise where treatment with unlicensed products is deemed appropriate. In these circumstances, liability rests with the prescriber.

All cases involving the use of unlicensed medicines require documented, informed consent of the patient.

Aim to prescribe a licensed medicine first, then a licensed medicine in an unlicensed way e.g. crushed tablets. NHS Choices Guidance: Medicines Information – Brand Names and Generics. Only then a special and preferably a Drug Tariff special. Gov.UK Guidance: Off-label or unlicensed use of medicines: prescribers’ responsibilities

Always consider prescribing an alternative licensed medicine within its licensed dose and indications instead of an unlicensed or off-label medicine.

Be satisfied that there is a sufficient evidence base and/or experience of using the medicine to demonstrate its safety and efficacy.

Take responsibility for prescribing the medicine and overseeing the patient’s care, including monitoring and follow-up.

Record the medicine, reason for prescribing and that you discussed the relevant safety and efficacy issues with the patient and received their consent unless it is current practice to use the medicine out with its licence.

Gov.UK Guidance
Full details of the treatment must be documented on the patient's medical records including the following information:

<table>
<thead>
<tr>
<th>Prescriber’s Name</th>
<th>Reason for the prescribed treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quantity of medicines prescribed on a single prescription form</td>
<td>That you have discussed compliance with the patient <a href="#">General Medical Council Guidance</a></td>
</tr>
</tbody>
</table>

The symbol: ![Symbol](image) in the BNF denotes those preparations that are considered by the Joint Formulary Committee as less suitable for prescribing. Although such preparations may not be considered as drugs of first choice, their use may be justifiable in certain circumstances.

The black triangle symbol: ![Symbol](image) in the BNF indicates newly licensed medicines that are monitored intensively by the MHRA. There is only limited information available from clinical trials on their safety and therefore special consideration should be taken when prescribing them.

Prescribers must report all adverse reactions for black triangle drugs. Please refer to the ‘Suspected Adverse Drug Reactions’ section below.  
NICE Guidance: [Adverse Reactions to Drugs](#)

Details of any suspected adverse drug reactions should be reported using the [Yellow Card Scheme - MHRA](#)

### 5.5 Security and Safe Handling of Prescriptions

Security of prescriptions is the responsibility of both the employing organisation and the non-medical prescriber.

The prescriptions should not be left unattended and when not in use placed in a locked drawer/secure stationery cupboard or having a lockable printer. It is advisable to only hold a minimal stock of prescriptions. The employer must keep records of the serial numbers of pre-printed prescriptions and no circumstances should blank prescriptions forms be pre-signed before use. Prescriptions forms should never be left in a car. [Care Quality Commission](#)
6. Training, Ongoing Education & Supervision

6.1 Pre-Requisites

Anybody applying to undertake the independent prescribing course must have the support of their employer and be in a role that allows them to use their prescribing qualification on a regular basis.

The potential prescriber must have a qualification that reflects their ability to safely and accurately assess and ideally diagnose a patient’s condition prior to undertaking an Independent Prescribing course. This should ideally be a History Taking and Physical Assessment module at Level 6 or above.

The potential student must have access to an appropriate supervisor throughout the course who meets the requirements for the module/s. This currently is a medical supervisor but new standards are out for consultation and this could in the future be another NMP.

6.2 Returning to Practice

Following a break in prescribing practice of 3 months or more it is advisable that the prescriber should agree with their employer and undertake a period of adjustment and education prior to prescribing again.

This period of adjustment should be supported by a supervisor who is an experienced prescriber.

6.3 Competencies and Supervision

All independent prescribers should have clinical supervision from a fellow prescriber who they feel able to discuss their prescribing practice with.

All independent prescribers must practice using professional guidance and legislation appropriate to their role.

It is the responsibility of all independent prescribers to ensure they have the correct professional liability insurance for their role and should be agreed and discussed in conjunction with their employer.
6.4 Clinical Supervision

This relates to both personal and professional development and is linked to:

- Lifelong Learning
- Reflecting on your Practice
- Making changes where necessary to improve performance

Clinical supervision can take place between a group of professional and on a one-to-one basis. Some take the form of discussion around real case studies and reflect on the scenario and outcome with the emphasis on facilitated learning. One to one supervision may also be referred to as mentoring usually provide by a more experienced colleague, this can also take place as ‘action learning sets’. A key element of any supervision is reflective practice which for nurses is a requirement of the NMC revalidation process. Nursing & Midwifery Council: Revalidation

As a ‘trainer/teacher’ your role may be to supervise others ensuring competencies, safety, assessment and providing regular feedback. This could also be described as educational supervision. Please refer to the reference section at the back of this booklet for useful resources.

If you are unable to secure clinical supervision within your practice you may want to consider contacting your CCG for support and or link in with your local NMP forum. For example, Portsmouth CCG organise an NMP forum every 2 months to provide support and sharing of good practice and updates.
7. Non-Medical Prescribers

7.1 Newly Registered NMP or Relocation to a New Area

To ensure that your prescribing medication costs are charged to the correct GP Practice and that your prescribing data collated centrally by the NHS Business Services Authority (NHSBSA) is accurately reported please contact your CCG to notify them that you are a Prescriber. This will enable you to be registered as a prescriber with your practice and make manual prescription pads available to order if required. This must be completed prior to any prescriptions being printed in the practice with your details.

Always ensure that the previous practice also informs the local CCG that you have left the area, securely destroys any manual prescription pads and prevents your code to be used or printed going forwards.

Currently your CCG is responsible and authorised to make any changes to your details that are held on the NHSBSA system. Therefore, any changes to your details must be fed back to your CCG, and this is most likely to happen through your Medicines Management Team. Please contact your CCG Medicines Management Team for access to the latest guidelines, new and updates.

7.2 Governance and Nurse NMP Prescribers

Nurse Prescribers are individually and professionally accountable to the Nursing & Midwifery Council (NMC) for this aspect of their practice and must always act in accordance with the NMC Code. Successful completion of an approved programme of preparation and training for non-medical nurse independent prescribing must be annotated on the NMC professional register.

Useful links:
- RCN Fact Sheet
- RCN Nurse Prescribing
- NMC Standards

7.3 Prescribing for Pregnant Women and Children

All prescribers will be faced with a variety of undifferentiated conditions and will need to be confident that they have the underpinning educational training and competencies to undertake this role, particularly in relation to children and pregnancy. It is advisable that all NMPs and their employer clarify each other’s roles, boundaries and expectations and provide suitable supervision.

All nurses should make themselves familiar with;

- The RCN Guide to Advanced Nursing Practice (February 2008, revised May 2012) and the section on page 8, on the role of "The ANP and Pregnant Women".
- CQC: The ANP Role
- The NMC Standards or Proficiency for Nurses and Midwives Prescribers (2015) pg. 6.
- The RCN document ‘Prescribing in Pregnancy’, particularly the comments on the post-natal period.
7.4 Revalidation for Nurses

Nurses could use evidence of ongoing learning and reflective practice around their prescribing as part of revalidation for the NMC. The Wessex LMC website [https://www.wessexlmcs.com/lunchandlearn](https://www.wessexlmcs.com/lunchandlearn) has a comprehensive section on revalidation and a ‘lunch and learn’ session available which you could look at as part of a team.

7.5 Nurse (NMPs) - Return to Practice and Reactivation

<table>
<thead>
<tr>
<th>Returning to Practice</th>
<th>Reactivation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Following a break in prescribing practice of 3 months or more it is advisable that the prescriber should agree with their employer and undertake a period of adjustment and education prior to prescribing again. This period of adjustment should be supported by a supervisor who is an experienced prescriber.</td>
<td>After a period of extended leave, it is the responsibility of the registrant and their employer to ensure that a prescriber is competent to prescribe. The attached competency framework (Appendix 1) could be used to evidence this. Supervision from another prescriber should be accessed throughout this period on a regular basis. The NMP may need to complete a clinical update prior to recommencing a prescribing role and will need to be assessed as competent. It is recommended that the NMP and manager identify a learning plan.</td>
</tr>
</tbody>
</table>

7.6 Pharmacists

The following is taken from the General Pharmaceutical Council requirements for pharmacists applying to undertake an independent prescribing programme. [General Pharmaceutical Council](https://www.gphc.org.uk). They should:

<table>
<thead>
<tr>
<th>Have at least two years’ appropriate patient-orientated experience in a UK hospital, community or primary care setting following their pre-registration year.</th>
<th>Have identified an area of clinical practice in which to develop their prescribing skills and have up-to-date clinical, pharmacological and pharmaceutical knowledge relevant to their area of practice.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Be a registered pharmacist with the GPhC or the Pharmaceutical Society of Northern Ireland (PSNI)</td>
<td>The provider must ensure that the pharmacist, has training and experience appropriate to their role. The DMP must have agreed to provide supervision support and shadowing opportunities for the student, and be familiar with the GPhC requirements and learning outcomes for the programmer.</td>
</tr>
</tbody>
</table>
Pharmacist prescribers are individually and professionally accountable to the GPhC for their practice and must always act in accordance with the Standards for Pharmacy Professional. Successful completion of an approved programme of preparation and training for Pharmacist non-medical independent prescribing must be annotated on the membership register of the GPhC.

Pharmacists do not yet undertake revalidation but this is under review, currently Pharmacists must undertake nine CPD entries a year. Revalidation and CPD

7.7 Physiotherapists

Physiotherapists nominated for training as a non-medical prescriber, The Chartered Society of Physiotherapy, must:

- Undertake approved training which leads to annotation of the HCPC register as a prescriber
- Ensure they are approved and insured as a prescriber within their place of practice and this is included in their job description
- Maintain their own prescribing competences to adhere to the Competency Framework for all Prescribers (see Appendix 1)
- Maintain ‘standard for prescribing’ as detailed in HCPC standards (2013) while maintaining HCPC standards of proficiency, standards of conduct, performance and ethics and continuing professional development

7.8 Future NMP Prescribers

There are many new roles for Advanced Practitioners (APs) being developed in primary care. Currently a review is being undertaken for a range of APs to be able to prescribe e.g. paramedics and other healthcare scientists. We are waiting for more information in this area. The NMC have recently launched a consultation on proposals that would potentially lead to nurses and midwives being able to prescribe much earlier in their careers.

The Health & Care Profession Council keep a Register of health and care professionals who meet their standards for their training, professional skills, behaviour and health. This link explains more about the medicines and prescribing rights of the professionals that they register. HCPC: Medicines and Prescribing Rights
THE CONSULTATION (COMPETENCIES 1-10)

Adapted from

Royal Pharmaceutical Society: Prescribing Competency Framework

Competency 1: ASSESS THE PATIENT

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Takes an appropriate medical, social and medication history, including allergies and intolerances.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.2 Undertakes an appropriate clinical assessment.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.3 Accesses and interprets all available and relevant patient records to ensure knowledge of the patient’s management to date.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.4 Requests and interprets relevant investigations necessary to inform treatment options.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.5 Makes, confirms or understands, the working or final diagnosis by systematically considering the various possibilities</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.6 Understands the condition(s) being treated, their natural progression and how to assess their severity, deterioration and anticipated response to treatment.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.7 Reviews adherence to and effectiveness of current medicines.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.8 Refers to or seeks guidance from another member of the team, a specialist or a prescribing information source when necessary.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## Competency 2: CONSIDER THE OPTIONS

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Considers both non-pharmacological (including no treatment) and pharmacological approaches to modifying disease and promoting health.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.2</td>
<td>Considers all pharmacological treatment options including optimising doses as well as stopping treatment (appropriate polypharmacy, de-prescribing).</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.3</td>
<td>Assesses the risks and benefits to the patient of taking or not taking a medicine or treatment.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.4</td>
<td>Applies understanding of the mode of action and pharmacokinetics of medicines and how these may be altered (e.g. by genetics, age, renal impairment, pregnancy).</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.5</td>
<td>Assesses how co-morbidities, existing medication, allergies, contraindications and quality of life impact on management options.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.6</td>
<td>Takes into account any relevant patient factors (e.g. ability to swallow, religion) and the potential impact on route of administration and formulation of medicines.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.7</td>
<td>Identifies, accesses, and uses reliable and validated sources of information and critically evaluates other information.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.8</td>
<td>Stays up-to-date in own area of practice and applies the principles of evidence-based practice, including clinical and cost-effectiveness.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.9</td>
<td>Takes into account the wider perspective including the public health issues related to medicines and their use and promoting health.</td>
<td>![Discussion Box]</td>
</tr>
<tr>
<td>2.10</td>
<td>Understands antimicrobial resistance and the roles of infection prevention, control and antimicrobial stewardship measures.</td>
<td>![Discussion Box]</td>
</tr>
</tbody>
</table>
### Competency 3: REACH A Shared Decision

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Works with the patient/carer in partnership to make informed choices, agreeing a plan that respects patient preferences including their right to refuse or limit treatment</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.2 Identifies and respects the patient in relation to diversity, values, beliefs and expectations about their health and treatment with medicines.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.3 Explains the rationale behind and the potential risks and benefits of management options in a way the patient/carer understands.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.4 Routinely assesses adherence in a non-judgemental way and understands the different reasons non-adherence can occur (intentional or non-intentional) and how best to support patients/carers.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.5 Builds a relationship which encourages appropriate prescribing and not the expectation that a prescription will be supplied.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.6 Explores the patient/carer understanding of a consultation and aims for a satisfactory outcome for the patient/carer and prescriber.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## Competency 4: PRESCRIBE

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Prescribes a medicine only with adequate, up-to-date awareness of its actions, indications, dose, contraindications, interactions, cautions, and side effects.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.2 Understands the potential for adverse effects and takes steps to avoid/minimise, recognise and manage them.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.3 Prescribes within relevant frameworks for medicines use as appropriate (e.g. local formularies, care pathways, protocols and guidelines).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.4 Prescribes generic medicines where practical and safe for the patient and knows when medicines should be prescribed by branded product.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.5 Understands and applies relevant national frameworks for medicines use (e.g. NICE, SMC, AWMSG and medicines management/optimisation) to own prescribing practice.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.6 Accurately completes and routinely checks calculations relevant to prescribing and practical dosing.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.7 Considers the potential for misuse of medicines.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.8 Uses up-to-date information about prescribed medicines (e.g. availability, pack sizes, storage conditions, excipients, costs).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.9 Electronically generates or writes legible unambiguous and complete prescriptions which meet legal requirements.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.10 Effectively uses the systems necessary to prescribe medicines (e.g. medicine charts, electronic prescribing, decision support).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.11 Only prescribes medicines that are unlicensed, ‘off-label’, or outside standard practice if satisfied that an alternative licensed medicine would not meet the patient’s clinical needs.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.12 Makes accurate legible and contemporaneous records and clinical notes of prescribing decisions.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.13 Communicates information about medicines and what they are being used for when sharing or transferring prescribing responsibilities/information.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Competency 5: PROVIDE INFORMATION

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 Checks the patient/carer’s understanding of and commitment to the patient’s management, monitoring and follow-up.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.2 Gives the patient/carer clear, understandable and accessible information about their medicines (e.g. what it is for, how to use it, possible unwanted effects and how to report them, expected duration of treatment).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.3 Guides patients/carers on how to identify reliable sources of information about their medicines and treatments.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.4 Ensures that the patient/carer knows what to do if there are any concerns about the management of their condition, if the condition deteriorates or if there is no improvement in a specific time frame.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.5 When possible, encourages and supports patients/carers to take responsibility for their medicines and self-manage their conditions.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Competency 6: MONITOR AND REVIEW

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Establishes and maintains a plan for reviewing the patient’s treatment.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6.2 Ensures that the effectiveness of treatment and potential unwanted effects are monitored.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6.3 Detects and reports suspected adverse drug reactions using appropriate reporting systems.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6.4 Adapts the management plan in response to on-going monitoring and review of the patient’s condition and preferences.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
## PRESCRIBING GOVERNANCE

### Competency 7: PRESCRIBE SAFELY

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.1</td>
<td>Prescribes within own scope of practice and recognises the limits of own knowledge and skill.</td>
<td></td>
</tr>
<tr>
<td>7.2</td>
<td>Knows about common types and causes of medication errors and how to prevent, avoid and detect them.</td>
<td></td>
</tr>
<tr>
<td>7.3</td>
<td>Identifies the potential risks associated with prescribing via remote media (telephone, email or through a third party) and takes steps to minimise them.</td>
<td></td>
</tr>
<tr>
<td>7.4</td>
<td>Minimises risks to patients by using or developing processes that support safe prescribing particularly in areas of high risk (e.g. transfer of information about medicines, prescribing of repeat medicines).</td>
<td></td>
</tr>
<tr>
<td>7.5</td>
<td>Keeps up to date with emerging safety concerns related to prescribing.</td>
<td></td>
</tr>
<tr>
<td>7.6</td>
<td>Reports prescribing errors, near misses and critical incidents, and reviews practice to prevent recurrence.</td>
<td></td>
</tr>
</tbody>
</table>
### Competency 8: PRESCRIBE PROFESSIONALLY

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.1 Ensures confidence and competence to prescribe are maintained.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.2 Accepts personal responsibility for prescribing and understands the legal and ethical implications.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.3 Knows and works within legal and regulatory frameworks affecting prescribing practice (e.g. controlled drugs, prescribing of unlicensed/off label medicines, regulators guidance, supplementary prescribing).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.4 Makes prescribing decisions based on the needs of patients and not the prescriber’s personal considerations.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.5 Recognises and deals with factors that might unduly influence prescribing (e.g. pharmaceutical industry, media, patient, colleagues).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.6 Works within the NHS/organisational/regulatory and other codes of conduct when interacting with the pharmaceutical industry.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Competency 9: IMPROVE PRESCRIBING PRACTICE

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.1 Reflects on own and others prescribing practice, and acts upon feedback and discussion.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9.2 Acts upon colleagues’ inappropriate or unsafe prescribing practice using appropriate mechanisms.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9.3 Understands and uses available tools to improve prescribing (e.g. patient and peer review feedback, prescribing data analysis and audit).</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
# Competency 10: PRESCRIBE AS PART OF A TEAM

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Discussion and/or observation by supervisor</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.1 Acts as part of a multidisciplinary team to ensure that continuity of care across care settings is developed and not compromised.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10.2 Establishes relationships with other professionals based on understanding, trust and respect for each other’s roles in relation to prescribing.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10.3 Negotiates the appropriate level of support and supervision for role as a prescriber.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10.4 Provides support and advice to other prescribers or those involved in administration of medicines where appropriate.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

How do you audit your prescribing?

Have you received clinical supervision and if so, please give a brief description?

What CPD needs relating to prescribing have you identified?

How are you planning to address these needs?

I have had the opportunity to discuss my prescribing as part of my annual appraisal with my practice manager and clinical lead at the practice

Suggestions of further sources of information:

- Lists of medicines which registered paramedics and appropriately qualified chiropodists / podiatrists may use under exemptions can be found in Schedule 17 to the Human Medicines Regulations 2012.

- An up-to-date list for appropriately qualified chiropodists / podiatrists is also available from the College of Podiatry.

- Information on PGDs is available on the NHS Patient Group Directions website. The MHRA has also produced useful guidance on PGDs.

- The National Institute for Health and Clinical Excellence (NICE) Medicines and Prescribing Centre provides information about prescribing and patient group directions.
